

Dear Valued Customer,

Domico Med-Device manufactures safe and effective products for medical use in accordance with our quality management system and in compliance with governing regulatory bodies. The state of California updated labeling requirements on August 30, 2018 and our product labels have been updated to meet these requirements.

Proposition 65, the Safe Drinking Water and Toxic Enforcement Act of 1986, requires businesses to notify customers about potentially hazardous chemicals present in products. The list of chemicals and additional information on Proposition 65 can be found here: <https://oehha.ca.gov/proposition-65>.

Prop 65 may require a warning even if products fully comply with federal safety requirements. The warning statement does not indicate harmful chemicals are present and simply reflects this requirement.

Thank you,

Nicholas Sievers
